

# IDENTIFY, SUPPORT, AND SAFELY REPORT VICTIMS IN CLINICAL SETTINGS

Human Trafficking Training for Healthcare Professionals

## MAKE SOCIAL CHANGE AND RECOGNIZE THE SIGNS FROM THE HEALTHCARE FRONT-LINE

This course educates medical personnel and students about the phenomenon of human and sex trafficking, trains them on how to recognize red flags and health problems associated with trafficking, and offers instruction on how to provide safe and appropriate health care for trafficked persons.

**INSTRUCTORS:** Dr. Kanani Titchen and Dr. Ami Carpenter

## ONLINE, SELF-PACED COURSE FORMAT

- Define human trafficking and describe types of human trafficking
- Differentiate facts from myths about human trafficking
- Explain vulnerability factors and conditions that put people at risk of being trafficked
- Identify red flags and indicators for recognizing potential trafficking victims
- Analyze the impacts of human trafficking on survivors
- Use a protocol for evaluating and responding to potential victims of human trafficking

## GROUP DISCOUNT
